tough security made easy

Helix™ Wall Dispenser

Secured dispensing combined with flexible merchandising

- Benefits both store associates and consumers
- Associates can quickly load and effectively maintain the retail set
- Consumers can dispense merchandise efficiently with the self-serve time delay function
- Provides more merchandising flexibility than common cabinet dispensers

Protective Shroud

Standard on all Helix™ products, the durable shroud protects the top of retail merchandise

Rapid Load (store associates)

Provides operational efficiency by allowing store associates to load the dispenser quickly

Simple Operation

Universal “knob” design provides simple instructions in a global communication style

Time Delay (consumers)

An average of 6 to 8 seconds dispense time creates the proper time balance for secured dispensing — the self-service functionality benefits consumers, retail management and store associates

Secured Base

Captured by the Helix wire and the protective shroud, the base cap secures the assembly to the wallboard

Secured System

The gear housing is locked to the horizontal wire form with our patented magnetic locking system. The Helix can only be removed from the wallboard using our proprietary OM Key™

Loading Switch

The “load” position allows store associates to load and maintain merchandising sets efficiently. The “dispense” position ensures consumers can only release merchandise by rotating the knob in a “one-way” clockwise direction.

Adjust over and down to load

Adjust up and over to dispense

Helix™ is available in three sizes to accommodate a wide range of merchandise packaging depths.

Thin: SFH03-15

Standard: SFH03-20

Thick: SFH03-35

The proprietary OM Key™ is used in Helix applications for plan-o-gram changes. The keys are available with AM or RF EAS technology.
