

# Know who accessed what and when.

Access Manager logs every lock interaction for every associate, making it easy to detect associate activity that is suspicious. Through its intuitive user interface, individual associates can be enabled with access to cabinets on a department or even a lock by lock basis.

Customizable reporting allows you to reduce shrink and improve store efficiency.

Access Manager also allows retailers to zone and audit PODs Series 1060 and 1560, and Commercial Solution CT300.

# Access Manager

## DATA COLLECTION

The IR3 Key is the data conduit that allows Access Manager to provide you the knowledge of who accessed a position and when. Watch the video [here](#).

1

IR3 Key is deauthorized with employee PIN on Key Authorization Station

2

Data is immediately pulled and stored in the Access Manager Controller

3

Daily activity viewed via Access Manager Interface
