VIDEO SECURITY & ACCESS CONTROL SOLUTIONS

MOTOROLA SOLUTIONS

OVIGILON

THE FIRST AND ONLY MISSION-CRITICAL ECOSYSTEM

Motorola Solutions has created the mission-critical ecosystem built for commercial business. It shares knowledge across your entire operation to enable powerful collaboration, streamline workflows and drive performance. A single platform — where communications, software, video and services operate seamlessly together — to reveal the insights which drive meaningful change.

SAFETY REIMAGINED

VIDEO SECURITY & ACCESS CONTROL

> MANAGED & SUPPORT SERVICES

COMMAND CENTER SOFTWARE

VIDEO SECURITY & ACCESS CONTROL

KNOW WHAT IS HAPPENING. ACT WITH CERTAINTY.

Our expansive portfolio of cameras, access control, infrastructure and management software is combined with powerful, AI-enabled analytics that take your video system from passive observer to active partner.

With high-definition cameras that continuously scan, analyze and learn from their environment, you get unprecedented visual detail combined with situational awareness to inform the best response. Investigations that once took hours or days, now take minutes with advanced search capabilities and integrations across the ecosystem that enable effortless sharing and collaboration.

At Motorola Solutions, we create a safe world.

RISK GROWS IN THE GAPS

SOLUTIONS FOR COMMERCIAL BUSINESS

The lack of visibility to what's happening in your business creates inefficiencies, leads to poor decision making and allows risk to thrive. We're shaping the future of business with an adaptable network of cameras with built-in intelligence to bring forward the information enterprise needs to do its work.

Fixed and mobile security solutions capture the critical details that our integrated analytics platform scans to identify the relevant information to share across the organization. When analytics work for you to identify patterns, hotspots and unusual activities, you have the knowledge to protect your business and grow. Our vision is to turn the masses of data that video networks capture into a powerful engine of unprecedented insights and data-driven decision making. So resources are better deployed, performance is driven, and risk is removed.

FIXED CAMERAS

Motorola Solutions offers a complete video security solution, with cutting-edge camera and sensor technologies that are embedded with features such as smart analytics to help focus your attention on the events that matter most. Our fixed camera portfolio includes cameras and technologies for any application, from 1–61 MP resolution in fixed, moving and multisensor options, to infrared (IR) and LightCatcher[™] technology to help you see more in dark environments, to a 360-degree view for broad coverage with fewer cameras.

H5 PRO CAMERAS

The new Avigilon H5 Pro Camera Line captures the best-in-class image details over vast areas, providing maximum coverage options through our most powerful and innovative ultra high definition cameras yet.

VIDEO INFRASTRUCTURE

Whether you need a couple of cameras to monitor a storefront or thousands of cameras to secure a large campus, using a complete Avigilon solution helps take the risk out of deployment and maintenance. Avigilon Network Video Recorders (NVRs) and appliances are pre-configured for enhanced system performance and to save you time during deployment.

NVRS & WORKSTATIONS

All models come with high-performance recording technology, a three-year Avigilon warranty with dedicated support and added features for your security needs.

LEARN MORE

¹ Optional, transceivers not included.

²These performance figures are based on validation testing by Avigilon, using Avigilon Control Center[™] software version 7.6.4. Assumes appliance-wide average per camera rates of classified objects leaving the field of view:

- H5A cameras: one every second
- H4A cameras: one every two seconds

• Non-analytics cameras running Classified Object Detection: one every second Additional licenses may be required. For more information, contact Avigilon Sales.

ABC-123

³Assumes a 3 MP camera with 1 MP license plate scan area and Frames Per Second (FPS) to recognize license plates up to vehicle speeds in Kilometers Per Hour (KM/H) or Miles Per Hour (MPH). Results may vary according to camera mounting parameters. LPR does not require an Analytics Kit.

Part number varies based on total storage capacity ().

NVR4X PREMIUM FIPS SERIES

Pre-hardened FIPS-compliant Network Video Recorders provide secure, reliable and scalable platforms for high performance end-to-end security solutions to meet FIPS 140-2 Level 2 Security Requirements and protect data-at-rest.

	AVIGILON AI	NALYTICS CAMERAS ²
MODEL	APPEARANCE SEARCH ONLY ³ OR FA	ACIAL RECOGNITION + APPEARANCE SEARCH ⁴
NVR4X Premium FIPS Series	Up to 200 cameras	Up to 50 cameras
	1 These performance forwards the based on val	idation tosting by Aviailon, using Aviailon Control Contor

¹ These performance figures are based on validation testing by Avigilon, using Avigilon Control Cente software. For more information, <u>contact Avigilon Sales</u>.

² The 10 GbE network connection requires the HD-NVR4X-SFPPLUS-SR transceiver accessory.

³ Requires ACC Enterprise license and Avigilon H3A, H4A, or H5A analytic enabled cameras. The Avigilon Appearance Search camera support limit does not affect any NVR throughputs for simultaneous recording, playback and live streaming.

⁴ Cameras enabled for facial recognition must also be enabled for Appearance Search and will reduce the number of cameras available for Appearance Search. For more information, see the <u>ACC 7 Hardware</u> <u>Sizing Guidelines for Avigilon Appearance Search Technology and Facial Recognition</u>.

Part number varies based on total storage capacity ().

AI NVR

The Artificial Intelligence (AI) Network Video Recorder (NVR) is a purpose-built security-hardened NVR, with built-in server-side analytics that unlocks Avigilon's advanced AI capabilities on any connected video stream. All models come with high-performance recording technology and a 5-year Next Business Day (NBD) with onsite parts delivery warranty.

Part number varies based on total storage capacity ().

ES APPLIANCE

Designed to keep video analytics and storage at the edge of the network to help lower bandwidth requirements for monitoring remote sites and decrease your system's total cost of ownership.

SPECIFICATIONS	aviolion
MODEL NAME	ES 8-PORT APPLIANCE
PART NUMBER	VMA-ENVR1-8P C A
Storage Capacity (TB) 🕒	4 8
Max. Recording Rate	130 Mbps
Appliance Analytics Support	Yes1
Form Factor	Small form factor, optional rack mount
Embedded Network PoE Switch	8 ports

LEARN MORE

¹ Requires ACC7-VAC optional licenses.

Part number varies based on total storage capacity 6.

ACC ES RUGGED APPLIANCE

A rugged and reliable solution for harsh environmental conditions, purpose-built to meet the challenges that are commonly faced in city security, critical infrastructure and temporary security applications.

SPECIFICATIONS

MODEL NAME	ACC ES RUGGED 8-PORT APPLIANCE					
PART NUMBER	VMA-RPA-RGD-8P2 VMA-RPA-RGD-8P4					
Storage Capacity (TB)	2	4				
Max. Recording Rate	130 Mbps					
Analytics Support	Yes ¹					
Form Factor	Ruggedized case with DIN rail mount option included					
Embedded Network PoE Switch	8 ports					
Warranty	5 year warranty					

¹ Analytics features are included by default with the addition of ACC camera licenses.

AVIGILON VIDEO ARCHIVE

Cost-effective storage option that provides a path for expanding video archives incrementally over time, delivering exceptional reliability with near-zero downtime.

SPECIFICATIONS

MODEL NAME	AVIGILON VIDEO ARCHIVE						
PART NUMBER		AVA-HED1- C TB1 AVA-EXP1- C TB1					
Storage Capacity (TB) 🕒	225	488	751	263	526	789	
Form Factor	50						
Max. Number of NVRs Connected	4 per Head Unit when attached directly; 12 per Head Unit when using 2 network switches ²						
Redundancy	Erasure coding						
Connectivity	iSCSI						

¹ Head units house the controllers that connect either directly with up to 4 NVRs or indirectly with up to 12 NVRs using 2 network switches. Expansion units need to be installed in the same rack and connected to Head Units to expand the capacity up to 1.5PB.

² 12 NVRs must be connected through 2x 10GbE SFP+ network switches to ensure redundancy. The switches are not sold by Avigilon and should be sourced by the customer. Each switch must support at least 12x Downlink ports (1 per NVR) and 4x Uplink ports.

Part number varies based on total storage capacity ().

REMOTE MONITORING WORKSTATIONS

An easy way to add high-resolution monitoring stations to existing systems. Select either a two- or four-monitor workstation, pre-loaded with ACC software.

¹These performance figures are based on validation testing by Avigilon, using Avigilon Control Center^{**} software version 7.6.4. Assumes appliance-wide average per camera rates of classified objects leaving the field of view:

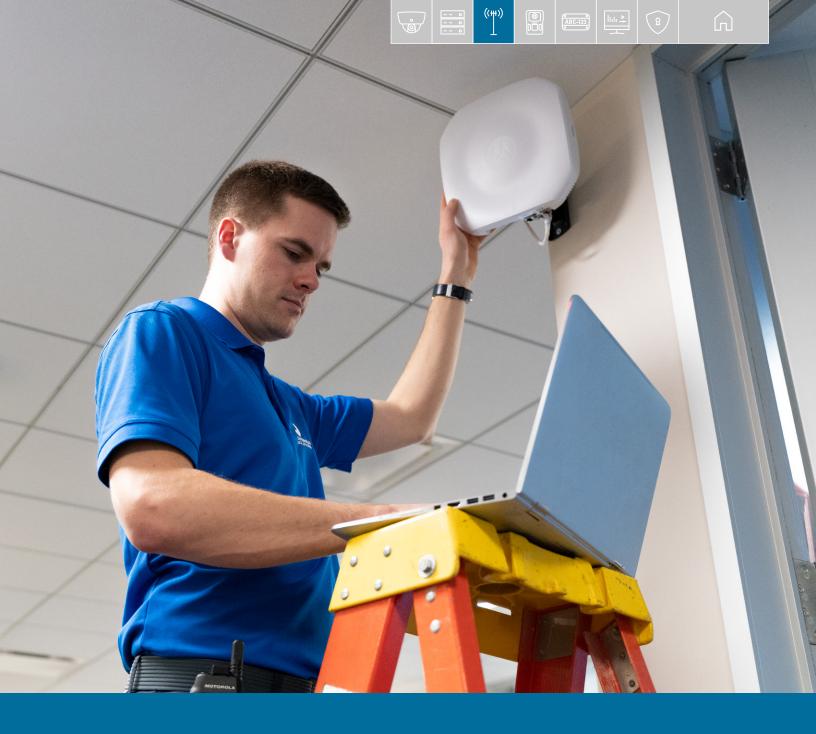

H5A cameras: one every second

• H4A cameras: one every two seconds

Non-analytics cameras running Classified Object Detection: one every second

Additional licenses may be required. For more information, contact Avigilon Sales.

³For cameras at 2 MP and 30 images per second (ips).

((H)) ENTERPRISE-GRADE PRIVATE BROADBAND

Nitro by Motorola Solutions is the first fully-managed Citizens Broadband Radio Service (CBRS) platform that combines private broadband data with business-critical voice, delivering enterprise-grade private LTE that is easy-to-deploy and outperforms Wi-Fi. Nitro's integration with Avigilon video security cameras provides large, remote or dense sites with greater video coverage, reliable performance, and robust data security and privacy.^{*}

NITRO

Designed to be deployed like a Wi-Fi network, Citizens Broadband Radio Service Devices (CBSDs) are mounted in desired locations and connected to other network gear typically racked in a central location. Avigilon camera connectivity into a Nitro network requires a fixed, third-party OnGo device containing a Nitro SIM card to gain network access and bridge the camera's ethernet communication capability with the network's CBRS wireless protocol.

SYSTEM COMPONENTS

DEVICE IMAGE	DEVICE NAME	DEVICE TYPE	PART NUMBER	DESCRIPTION
	SLX 2000	CBSD (Access Point)	AAE20048ENA1AN	Indoor CBSD 3550-3700M 250mW Includes: CBSD with 64 active stream support, wall/ceiling mount hardware, integrated 8dBi antenna, copper ethernet or fiber backhaul, POE++ or 12V DC input, integrated GPS receiver, PTP license.
•••	SLX 4000	CBSD (Access Point)	AAE40048ENB2AN	Outdoor CBSD 3550-3700M 316mW. Includes: CBSD with 64 active stream support, pole/wall mount hardware (including adapter bands), copper ethernet backhaul, DC -40 to -57V, 10m DC power cable, GPS antenna for direct mount.
	SLN 1000	Two-Way Radio	HK2120A	Purpose-built CBRS radio, delivering highly reliable broadband push-to-talk. Featuring a built-in Wi-Fi hotspot, the SLN 1000 helps you get the most out of legacy radio equipment, while taking advantage of CBRS mobility and security.
	JUNIPER SRX 345 FIREWALL	Firewall/Router (two (2) required)	T8577A	All Nitro networks require a minimum of one (1) SRX 345 for connectivity to the Nitro Cloud Core. Connection will be through the customer-provided Internet connection. Redundant links and/or redundant configurations are supported, additional switching not included.
	HPE ProLiant DL20 Gen10 Server	OnPrem Edge Gateway	SQM01SUM0319A	Includes: Nitro On-Prem Edge Gateway hardware (HP DL 20 appliance), NA AC power cord, and software. If redundancy or expansion is required, order a quantity of two.
	uFalconSTG PTP Bundle	PTP Timing Source	DSBNDLMSI2	Includes: uFalconSTG PTP, AC/DC Power Adapter, and a rack mounting shelf. All Nitro CBSDs require a timing source, either PTP or GPS. The uFalconSTG PTP provides PTP timing for up to 32 CBSDs, AC/DC power adapter and the rack mounting shelf items detailed below.
N/A	Expansion uFalconSTG PTP with AC/DC adapter	PTP Bundle	DSBNDLMSI21	Includes: PTP server with the AC/DC power adapter and is appropriate when a second co-located PTP server is required (i.e. expansion or redundancy).
N/A	EDGE TIMING MASTER	PTP Accessories	DSMFALCONST8SEGHOC	This is an expansion uFalconSTG PTP server that can be purchased to have redundancy in a network, if a network is being expanded beyond 32 CBSDs or if a spare PTP server is desired. The DSBNDLMSI2 bundle already includes a uFalconSTG PTP server.

*Nitro parts are sold by Motorola Solutions. To resell Nitro, an Avigilon Partner must apply to become a Motorola Solutions Partner: partnerapply.motorolasolutions.com

BODY-WORN CAMERAS

Commercial organizations need a mobile video security solution that protects people and proves professionalism. Next-generation body-worn cameras from Motorola Solutions capture high-quality audio and video from the wearer's perspective. Seamless integration with existing video management infrastructure via WiFi enhances situational awareness in the control room, delivering a powerful new narrative and enabling a smarter response.

VT100 CAMERAS

Designed to complement your current security function, providing additional body-worn protection to staff throughout any organization. Available for global use in commercial applications.

SPECIFICATIONS

MODEL NAME		VT100	
PART NUMBER		VT-100-N	
	Dimensions (H x W x D)	3.1 x 2.0 x 0.9 in (80 x 51 x 22 mm)	
Features	Weight	2.54 oz (72 g)	
reatures	Charging	Up to five hours from fully flat battery	
	Bluetooth	No	
	Recording Storage	16 GB	
	Recording Time	Up to three hours	
Video	Battery On Standby	Six months	
VILLEO	Battery Type	Lithium-Ion	
	Horizontal Field of View	130 degrees	
	Peer-Assisted Recording	No	
	WiFi Specification	802.11 b/g/n (2.4 GHz & 5 GHz)	
WiFi	WiFi Security	WPA2-PSK	
	WiFi Streaming	640x360 15 fps. Compatible with ONStream.

RFID-Card (x10)	RF-CARD-10

RFID Readers and accessories are compatible with VT100 & VB400 body-worn cameras

DOCKCONTROLLER

Simultaneously manage up to 84 body-worn cameras while also assigning them to operators using VideoManager software.

SPECIFICATIONS

MODEL NAME		DOCKCONTROLLER	
PART NUMBER		DC-200/ B	
	Typical Usage	Connected to VideoManager over Ethernet, with multiple docks attached via USB	
General Information	Management Software	VideoManager	
	Warranty	1 year return to manufacturer warranty	
Size & Weight	Dimensions (H x W x D)	6.1 x 5.3 x 1.5 in (154 x 136 x 37 mm)	
Size & Weight	Weight	23.3 oz (660 g)	
Scalability	Body-Worn Camera Support	Connect up to 84 body-worn cameras to one DC-200. Ideal for use with 14-port docks. Can also be used with up to 4 individual 1-port docks.	
	Unlimited VideoManager Connectivity	There is no limit on the number of DC-200s that can be connected to an instance of VideoManager	
	Operating Temperature	32 to 104 °F (0 to 40 °C)	
	Storage Temperature	-67 to +158 °F (-55 to +70 °C)	
Technical Specifications	Input Voltage (to supplied external power supply)	100 - 240V, 47 - 63Hz	
	Maximum Power Consumption	20W	
	High-Speed Footage Downloads	Gigabit Ethernet Port (1000/100/10 mbps) for rapid footage download and body-worn camera assignment	
	RFID-Compatible	Attach an RFID reader to one of the DC-200's USB ports to enable quick body-worn camera assignment	
Connectivity	Bandwidth Restrictions	Apply bandwidth rules to individual DC-200s to control how much footage is uploaded to VideoManager, and wher	
	High-Priority Configuration	Prioritize certain DC-200s to ensure that their footage is downloaded to VideoManager first	
	Slow Connection Configuration	DC-200s with this setting enabled will continuously try to offload footage to VideoManager, ignoring the bandwidth limit	
	Shared Bandwidth Groups	Add multiple DC-200s to one bandwidth group to ensure that the bandwidth limit is shared equally between them

LICENSE PLATE RECOGNITION SOLUTIONS

License plate recognition (LPR) systems from Motorola Solutions aren't one-size fits all, but rather designed for specific environmental needs. Our purpose-built applications for enterprise ensure your data is actionable and secure. Add an unmatched layer of efficiency to your parking and security operations with license plate recognition detections, patented vehicle location analytics and plate-based enforcement tools.

H4 LICENSE PLATE CAPTURE (LPC) KIT

Uses IR illumination, visible light filtering and license plate recognition analytics to capture license plates at typical vehicle speeds in varying lighting conditions.

VIDEO MANAGEMENT SOFTWARE

Whether you're monitoring video from fixed cameras or your suite of body-worn cameras, our video management solutions provide the control and AI-enabled tools to help ensure critical events do not go unnoticed.

ACC 7 SOFTWARE

Powerful software doesn't have to be complicated. ACC software leverages AI technology to give you control over your video security and focus your attention on what matters most. Use it with Avigilon cameras and sensors and/or leverage existing assets by using it with third-party devices.

AVIGILON CLOUD SERVICES

The Avigilon Cloud Services (ACS) platform connects your ACC sites to the cloud and enables secure access to your system from anywhere using an internet browser. Operators can review live and recorded video as well as monitor the health of all cloud-connected ACC sites, including critical components such as cameras and servers.

հե

SPECIFICATIONS

	Anywhere Access	Organizations with distributed locations can easily access their ACC sites securely from anywhere on a browser or mobile device.
Centralized Access	Easy Remote Access	Remotely monitor multiple locations and cameras to quickly detect, verify and act on events.
	Cloud Connectivity to ACC Sites	Connect ACC sites to the cloud to converge media access, system management, and integrations.
	Tools for everyday operation	Access live and recorded video, create and view bookmarks, manage PTZ controls, and export videos to a local drive.
	Enhanced Situational Awareness	Provides timely and proactive responses to analytic alarms, sent from ACC software as push notifications directly to the ACC Mobile 3 app.
	Firewall Traversal	Firewall traversal enables secure remote access with minimal or no firewall reconfiguration.
Security	Federated Authentication	Centralize administration of user identities and use corporate credentials to access ACC, ACM and ACS software.
	Seamless User Provisioning	Provisioning users is simple, as existing ACC group privileges are inherited for web client or mobile app viewing.
	Real-time Awareness	Confirm the operational status of your deployment to prioritize site maintenance activities and optimize uptime across all system components.
System Health	Health Dashboard	Review a single health dashboard that rolls up the active status of all recorders and connected cameras.
Monitoring	Remote Configuration Access	Access configuration details of recorders and cameras across all cloud-connected ACC sites.
	Remote Site Upgrades	Push software upgrades remotely to one or more ACC sites simultaneously, ensuring all of your sites are always on the latest versions of ACC.
Technical	Compatible ACC Platform	ACC 7.10 or later is required to connect ACC sites to Avigilon Cloud Services.
Specifications	Compatible ACC Mobile Platform	ACC Mobile 3 App is required to support remote access via a mobile device and to receive analytic alarms from ACC.

KEY FEATURES

The ACS platform enables a modern cloud-connected user experience, accessible without installation from a web browser. It lays the foundation for ACC customers to connect to the cloud and take advantage of capabilities and features that provide centralized access across distributed systems.

Our platform provides for the delivery of value-add services, helping to improve your up-time, and enhance productivity, while also strengthening your security. The ACS platform simplifies the management of physical security systems for customers with multi-site facilities and distributed security systems from anywhere.

VIDEOMANAGER SOFTWARE

SUPPORTS VT100 & VB400 BODY-WORN CAMERAS

Browser-based system for management of users and devices as well as the managing, storing and sharing of digital evidence.

hh よ

SPECIFICATIONS

	Granular Permissions	Users can only access the parts of the VideoManager interface which are relevant to their workflow.
	Granular Sharing	Incidents and videos can be automatically or manually shared between users and groups on VideoManager. Instances can be shared with workers who are not on VideoManager, using time-sensitive links or exports.
Workflow Control	Permissions Overview	Administrators can see permissions associated with a user, and how they got those permissions.
	Priviledge Escalation	Authorized users can temporarily elevate their priviledges for a limited time, in order to perform certain actions on VideoManager.
	Deletion Policies	Configure how long footage is kept on VideoManager before it is deleted.
	Automatic DockController Firmware Upgrades	Ensure your suite of DockControllers always have the latest firmware, eliminating manual upgrades. Configure a specific timeframe for DockController firmware upgrades, to minimize workflow disruption.
	Comprehensive Audit Trail	A comprehensive audit log of every action performed in the system is created. Users can create and download audit logs to view these actions if necessary.
Security	Access Control Keys	Without a device's access control key, undownloaded footage on a device is inaccessible.
	File Space Encryption	Footage, report and export filespaces are automatically encrypted for extra security.
	Bulk Edit	Large numbers of events can be instantaneously deleted or added to incident collections. Large numbers of body-worn cameras can be assigned or upgraded in parallel.
Scalability	User Groups	Put multiple users in a group for sharing and management purposes. Groups can be supervised by individual users, or other groups.
,	Reports Creation	Download reports detailing various aspects of VideoManager activity e.g. when devices were docked and undocked.
	Live Statistics	View real-time statistics with information about how VideoManager is being used.
Technical	Compatible Server Platforms	Windows Server 2016 Essentials, Standard and Datacenter, Windows Server 2012 R2 Essentials, Standard and Datacenter, Windows Server 2012 Essentials, Standard and Datacenter, Windows 10 Pro and Enterprise and Windows 8.1 Pro and Enterprise
Specifications	Compatible Client Browsers	Microsoft Internet Explorer 11 (Windows 7/8.1/10), Microsoft Edge 14+ (Windows 10), Firefox 47+ (Windows 10), Chrome 48+ (Windows 7/8.1/10, MAC OS X v10.10)

CONNECTIVITY FEATURES

- Integrates with ACC video management software (via ONStream technology)
- Can be enabled as a central VideoManager, to which other instances of VideoManager ("sites") can be connected
- Connect VideoManager to CommandCentral Vault, for footage storage and correlation with other CommandCentral Suite applications¹
- Group footage and other important media in an incident for ease of view

EVIDENCE PREPARATION FEATURES

- Put multiple incidents in an incident collection for sharing and management purposes
- Redact footage and images using effects like bluring, pixelation and highlighting. Audio, text and zoom redactions are also available
- Non-video media (PDFs, MP4s, JPGs), and videos which were not recorded using VT100 or VB400 can be imported to VideoManager and added to incidents

LEARN MORE

¹ Requires CommandCentral Vault subscription.

The Access Control Manager (ACM) system is a physical access control system for enterprise-class installations, designed to help you focus on securing your people, property and assets, while giving you the flexibility to respond to alerts wherever you are. It seamlessly integrates with ACC software to provide you with a powerful and unified security solution that helps you proactively monitor and secure your sites.

ACM 6 SOFTWARE

Avigilon Access Control Manager (ACM) is a physical access control system for enterprise-class installations, designed to protect people, property and assets with advanced alarm and identity management providing superior control of access to facilities. This 100% browser-based solution offers the flexibility to respond to alerts from anywhere. ACC unification offers a powerful end-to-end security solution to monitor and secure sites.

DETAILS

	Integrated Badging	Ability to design and print badges from within the ACM Browser.
ldentity Management	Collaborations	Collaboration provides the ability to exchange data between the Avigilon access control appliance application and a large number of other database types (e.g., LDAP, SQL Server, Oracle RDBMS, CSV imports, Generic XML, REST API Tools).
	Identity Correlation Report	Contact tracing tool to help verify identities that may be at risk by having close contact with infected individuals.
	Event Correlation & Alarm Monitoring	Alarm management workflow, with visual representations of alarms using color-based priority indicators, audible alerts, the ability to view live and recorded video, append notes, receive instructions, acknowledge and clear alarms.
Alarm	Integrated Video & Mapping Interface	Automated alarms generated by ACM can be viewed on a map and linked to the associated live or recorded video stream from ACC software.
Management	Email Notifications	Receive automatic email notifications of access control events.
	Identity Mustering	This interactive tracker can pinpoint missing personnel quickly with a real-time visual display of where people are at all times based on their badging activity.
	Controllers & Sub-Panels	Protect and future-proof your access control investment by using open-field hardware from leading manufacturers.
	Intrusion Detection	Integration to intrusion detection systems to automate the management and control within the ACM system.
Open-Field	Wireless Locks	Integration with leading third-party wireless lock vendors.
Hardware Support & Integrations	Biometric Readers	Integration to biometric fingerprint reader technology.
	pivCLASS	Integration with HID® pivCLASS® technology when implemented in an HSPD-12 environment requiring FIPS 201-2 evaluation program approval.
	Video Security	Unification with ACC software and integration with other third-party video management software to better inform responses with video context.
	Turnkey Operation	Easy installation experience with server appliances that are ready to go the moment you plug them in.
	Templates	Wide selection of easy-to-use templates for doors and wiring for faster configuration.
Easy to Use	Customized Reporting	Pre-defined, ready-made reports that can be customized to display important access control data.
& Deploy	Peer-to-Peer Replication	Patented technology that allows for replication of identity data on multiple appliances across many sites. This embedded technology requires no additional software or hardware and simplifies identity management, promotes consistency of identity data and reduces data entry efforts.
	Scalable Deployment Model	ACM appliances allow you to start with what you need on individual appliances, then expand by adding doors and replicating to additional appliances as your organization grows.

KEY FEATURES

The Avigilon Access Control Manager (ACM) system is designed to keep your focus on securing people, property and assets, and maximize your time by helping you respond immediately to alerts wherever you are. The ACM[™] system is 100% browser-based, requiring no software installation. Deploying hardened linux-based appliances, we use openfield hardware to leverage a breadth of standardized products from trusted manufacturers for different solutions to uniquely fit customer needs. It also supports third party integrations through our RESTful API. The ACM system leverages an open architecture, integrates identity management and video surveillance such as ACC video management software and achieves a high level of scalability with a low cost of ownership. It delivers a ready-to-deploy solution that provides the performance you expect from an enterprise-class solution.

ACM 6 SYSTEM

Designed to help you focus on securing your people, property and assets, while giving you the flexibility to respond to alerts wherever you are.

STANDARD FEATURES

- Quick online license management
- Email notification
- Event monitoring and schedules
- Identity search, import/export and management
- Panel and door status
- Preconfigured and custom reports
- Firmware updates
- OSDP In/Out door support
- Backup and restore

- PoE compatible Mercury hardware
- Migration from ACM Embedded Controller
- Mercury and HID hardware interoperability
- Software integrations (video, intrusion, wireless locks and visitor management)
- Biometric integrations
- Support for Mercury Security large encoded card formats

• Graphic maps and muster dashboard

8

- Photo import/export
- Alarm management and acknowledgment
- Badging
- Multi-language
- System configuration templates for doors, wiring, input and output, to enable quick Batch Add setup
- Mercury Security panel certificates for added security
- GSA approved products list

ABC-123

DETAILS

MODEL NAME	BOSCH INTRUSION INTEGRATION
PART NUMBER	AC-SW-LIC-BOSCHINTR-1PANEL-6-P
FANT NOWDEN	AC-SW-LIC-BOSCHINTR-10PANEL-6-P
Supported Panels	Mid-range: B3512, B4512, B5512, B6512
	Commercial: B8512G, B9512G, D9412GV4 V2, D7412GV4
Features	Colour graphic touch screen display for easy operation
	Built is presence detector lights the diaplay when your approaches keyned
	Built-in presence detector lights the display when user approaches keypad
	Built-in proximity reader allows use of a token or card as replacement for a passcode, or for use with dual authentication for high security areas
	Four inputs and one output provide cost effective expansion
	ACM integration enables quicker verification of intrusion events via live video triggers
	No additional access hardware or wiring required — connects to IP networks

ACM VERIFY VIRTUAL STATIONS

 \sim

ACM Verify allows any browser-enabled smart device to act as a virtual station. It works by recording and confirming an individual's identity using a PIN code, enabling you to extend the capability of your access system to locations where physical access doors are not feasible.

8

DETAILS

MODEL NAME	ACM VERIFY
PART NUMBER	AC-SW-LIC-AVO-VER-5VS-6-P
	AC-SW-LIC-AVO-VER-16VS-6-P
Features	Device pairing allows you to easily link a device to a virtual station for greater security
	Verify profiles by comparing a person's appearance with a saved database image
	Send verification events to ACM and view a list of recorded personnel at each virtual station
	Activate global actions from events generated by virtual stations
	Enable or disable virtual stations from ACM
	Suited for sites that do not have access controlled doors or locks such as outdoor mustering stations for fire drills, a bus for school trips or a work area in an open-plan office
